

Senior Partner Care to move its base to One Senior Place

Senior Partner Care Services of Brevard, a provider of in-home senior care, announced that it will locate its headquarters to One Senior Place in Viera.

One Senior Place, an 18,000-square-foot new-concept business community, is designed to be the first one-stop facility for senior care and services in East Central Florida. Scheduled to open later this year, One Senior Place is an all-inclusive "elder-services only" business.

"We are happy to be opening our third new location in just four years, but we're especially excited to be doing it at One Senior Place," said Kara Anderson, regional director. "With the demand on the rise for senior services, we know that in-home care is one of the first services families secure. The exposure in a business environment like One Senior Place that focuses on senior care, products, and services is ideal for any business targeted to seniors."

Senior Partner Care Services is one of the largest businesses of its kind in Brevard, providing a broad range of services to seniors in their homes including care and companionship, post-rehabilitation or hospitalization home care, personal-care assistance, dementia care, transportation, nutrition, safety and fall prevention.

The agency provides home care throughout four counties in Central Florida's Health Care District 7, employing more than 100 caregivers and six administrative staff. With the move to One Senior Place, the company looks to expand its market share in Brevard County, by "extending its reach into the demographically desirable Viera area," Anderson said.

Senior Partner Care Services will join a strategic group of businesses that will serve the senior market in this unique setting, she said.

One Senior Place offers exclusivity to each business type that joins the facility and all businesses work in cooperation to provide seniors access to information and resources. The facility will include an on-site Senior Resource Library staffed by trained elder-care managers, plus home care and hospice providers, physical therapists, medical-equipment suppliers, community and nonprofit resources, elder-law attorneys, senior financial planners, travel agents, and more.
